RE: Watson v. City of Phoenix

At your request, below is a written summary of my opinions regarding the above named case. My opinions are based on my training, experience and research as a Professor of Clinical Medicine in the Department of Emergency Medicine at the University of California San Diego Medical Center. I have conducted numerous human research studies on the topic of restraint physiology that have been published in peer-reviewed medical journals and presented at national medical meetings and scientific assemblies. I am also a practicing emergency physician, board-certified in the specialty of emergency medicine, and a Fellow of the American College of Emergency Physicians and American Academy of Emergency Medicine.

In formulating my opinions regarding the specific issues of this case, I have relied upon my own scientific and clinical research on restraint physiology, a review of the current medical and scientific literature relevant to this case, and the specific materials you forwarded me regarding the above named case, including the complete City of Phoenix incident police report, in-custody death investigation report, medical records of Doris Watson including those from J.C. Lincoln Hospital, Phoenix Fire Department EMS report, Maricopa County Medical Examiner's autopsy report, and interview and deposition transcripts of Chara Watson-Nance, Officers Buckner, Garcia and Gray, and Kellie Bowers. Except as noted, my opinions and testimony will be to a reasonable degree of medical certainty. If additional pertinent information is revealed and provided to me subsequent to this letter, my opinions may change.

In brief, Doris Watson was a 70 year-old woman with history of coronary artery disease, hypertension, and psychiatric bipolar disorder, who was involved in an altercation and struggle with law enforcement personnel on March 13, 2007. Ms. Watson was reported to be acting in a bizarre manner, refusing to cooperate with law enforcement personnel called to the incident. She became involved in a struggle with Officers Gray, Buckner, and Garcia and was eventually taken to the ground and restrained in the prone position. Ms. Watson was handcuffed with her wrists behind her back and her ankles were restrained. After she was restrained, Ms. Watson became unresponsive and responders noted she was apneic, pulseless and in cardiopulmonary arrest. Resuscitative measures including

Theodore C. Chan, MD, FACEP
5521 Bretonwood Court
San Diego, CA 92130
tcchan@ucsd.edu

cardiopulmonary resuscitation, advanced airway management, and cardiac medications were administered by EMS personnel in the field. Ms. Watson was transported to J.C. Lincoln Hospital Emergency Department where resuscitative measures were continued, but ultimately proved unsuccessful and she was pronounced dead at that time.

On autopsy, the coroner found evidence of significant atherosclerotic cardiovascular disease, cardiomegaly with mild left ventricular hypertrophy, and evidence of blunt force trauma including mild abrasions on the forehead and face, two contusions on the back, as well as abrasions and contusions over the extremities. The pathologic diagnoses by the coroner included: "acute psychotic episode with confusion, agitation, aggressive behavior, physical exertion and confrontation with others, followed by a brief restraint and sudden cardiac arrest". The Medical Examiner attributed the cause of death to coronary artery disease with "acute psychotic episode with physical exertion and confrontation with others".

It has been alleged that positional or restraint asphyxia may have played a role in Ms. Watson's death. It is my opinion that positional or restraint asphyxia did not cause respiratory compromise that would have resulted in asphyxiation and death in this case. By way of background, positional or restraint asphyxia is a term that was initially used to describe the deaths of individuals who were found in body positions that compromised respiratory function. Most commonly, these cases involved individuals in whom their position led to obstruction of the upper airway (such as from extreme head-neck hyperflexion) and who were alcohol intoxicated (to the point of being unable to remove themselves from the lethal position).¹ In the late 1980s, this term was applied as a cause of death in reports of sudden deaths that occurred to persons who were being restrained while in custody. Proponents of this theory argued that individuals placed in the hobble position (hogtie or prone restraint position in which individuals were placed prone on their stomach with wrists handcuffed behind the back and ankles secured to the handcuffs) were unable to breathe because the position caused chest wall and abdominal restriction that prevented adequate expansion of the lungs and subsequently led to asphyxiation. However, many argued that other factors played a greater role in causing these deaths reported in the medical literature.

There is little scientific evidence to support the notion that prone restraint results in life-threatening respiratory compromise or asphyxiation. The theory of positional asphyxia as applied to custody restraint was largely based on the work of Reay et al, who studied 10 healthy subjects after exercise and found delayed recovery of blood oxygen levels and heart rate in the hobble position.² We conducted a more comprehensive study investigating the effects of body position on respiratory function after exertion that was published in the Annals of Emergency Medicine and reviewed in another article published in the American Journal of Forensic Medicine and Pathology.^{3,4} In our study involving 15 human volunteers, we studied respiratory function in the sitting, supine (laying on the back), prone (laying on the stomach), and hobble position. While we found a slight progressive decrease in pulmonary function (the amount of air movement in the lungs), these changes were within normal range. Accordingly, we found no

Theodore C. Chan, MD, FACEP
5521 Breitewood Court
San Diego, CA 92130
tcchan@ucsd.edu

evidence of decreased blood oxygen levels or increased carbon dioxide levels (to suggest inadequate ventilation) in the hobble position. These findings have been confirmed by other independent investigators who found no significant decrease in blood oxygen levels in individuals placed in similar restraint positions.^{5,6}

As a result of this evidence, Dr. Reay, one of the chief proponents of the positional asphyxia theory with custody restraint, has written that "the hog-tied prone position should be viewed as not producing significant physiologic respiratory compromise, and it does not produce any serious or life-threatening respiratory effects".⁷ In Ms. Watson's case, she appeared to be in a less-restrictive prone or semi-prone position at the time of her cardiopulmonary arrest, indicating even less of a risk for so-called positional or restraint asphyxiation. Officers describe Ms. Watson as yelling and screaming during the restraint process, as well as breathing after she was handcuffed in the prone position, indicating that her respiratory status was not compromised to the point of asphyxiation at that time. In addition, carbon dioxide measurements in the field indicate that Ms. Watson was not suffering severe, life-threatening hypoventilation that would indicate risk for positional or restraint asphyxia as a cause of her cardiopulmonary arrest.

During the time of the struggle when Ms. Watson was being restrained, weight force may have been applied to her body by Officers to hold her down. Some have now argued that additional weight force, as might have occurred in this case during the restraint process, causes greater respiratory compromise to an individual that can lead to asphyxiation. However, the time during which law enforcement were struggling with Ms. Watson in the prone position was short and unlikely long enough to lead to death by asphyxiation. In addition, there is little evidence or findings to suggest that Ms. Watson suffered any marked increased in intrathoracic cavity pressure as a result of weight force (unlike victims of traumatic asphyxiation). Furthermore, we have conducted two studies investigating the effect of weight force while restrained on human volunteers. In our initial study, we found no evidence of hypoxia or hypoventilation in human subjects on whom moderate amounts of weight were placed on their back in the prone restraint position.⁸ In our subsequent study, we placed up to 225 pounds of weight force on human subjects in the prone restraint position and found no life-threatening abnormalities in ventilation.⁹ These results are consistent with other investigators who have conducted similar weight force studies on the prone restraint position and found no evidence of hypoxia to indicate risk for asphyxiation.¹⁰

In conclusion, it is my opinion that positional or restraint asphyxia did not cause respiratory compromise that led to Ms. Watson's death. In accordance with the Rules of Civil Procedure, my compensation for services rendered in association with this case are \$450/hour, including travel time and expenses. Prior cases in which I have provided testimony over the past four years are: Jardine v. City of Tempe, Tempe, Arizona, 2005; Kapanak v. City of Phoenix, Phoenix, Arizona, August 2005; Varela v. Cuny, Mesa, Arizona, September 2005; Loomis v. City of Puyallup, Washington, 2005; Nunez v. County of San Joaquin, 2006; Chavez v. City of Los Angeles, 2006, 2008; Singleton v. Charleston EMS, South Carolina, 2006; Alvarado v. City of Los Angeles, 2006; Pullman

RESEARCH GRANT FUNDING:

1. Co-Principal Investigator with Dr. Tom Neuman, for study entitled, "Restraint Position and Positional Asphyxia." Study funded by the County of San Diego, Grant #94-1974R, 1995. Amount: \$33,900.
2. Principal Recipient, unrestricted grant from Cook, Incorporated for Research and Education on the Melcker Cricothyrotomy Kit, 1997-98. Amount: \$10,000.
3. Co-Principal Investigator for study entitled, "Comparison of Respiratory Function in the Prone Maximal Restraint With and Without Additional Weight Force on the Back." American Academy of Forensic Sciences, with Doctors John Eisele, Jack Clausen, Tom Neuman and Gary Vilke, 1999-2000. Amount: \$3,000.
4. Principal Investigator for study entitled, "The Impact of Oleoresin Capsicum Spray on Respiratory Function in Human Subjects in the Sitting and Prone Maximal Restraint Positions." Study funded by the National Institute of Justice, U.S. Department of Justice, 1998-99. UCSD No. 98-7107; USDOJ Federal Award #98-IJ-CX-0079. 2001-02. Amount: \$128,176.
5. Co-Principal Investigator for study entitled, "Improving Access, Awareness and Use of the California Regional Poison Center in Two Ethnically Diverse Communities in San Diego." UCSD Civic Collaborative, with Dr. Richard F. Clark, 2001-02. Amount: \$5,000.
6. Co-Principal Investigator for study to design and assess the impact of a community outreach program to improve awareness and use of the California Poison Control System by Latino and other underserved communities in San Diego. Part of a Community Outreach Partnership Centers Program New Directions Grant from the federal Office of Housing and Urban Development, with Dr. Richard Clark and Dr. Vivian Reznik (UCSD Pediatrics Department), 2002-04. Amount: \$4,000.
7. Principal Recipient, unrestricted grant from Cook, Incorporated for Research and Education on the Cuffed Melcker Cricothyrotomy Kit, 2003. Amount: \$12,000.
8. Principal Investigator & Project Director, for project on Emergency Department Crowding & Safety Net Assessment, funded by the Urgent Matters Program, Robert Wood Johnson Foundation, grant # 048545. Amount: \$150,000 total (\$100,000 technical assistance; \$25,000 UCSD project direction, \$25,000 safety net assessment).
9. Co-Investigator and now co-Principal Investigator (with Drs. Les Lenert and Prof. William Griswold) for study entitled Wireless Internet Information System for Medical Response to Disasters (WIISARD), funded by the National Library of Medicine. 2003-2008. Amount: \$3,200,000.
10. Co-Principal Investigator, with Dr. Daniel Davis, for study entitled Emergency Department National Alcohol Screening Day, Alcohol Education Project, funded by NIH, grant #1 R03 AA015120-01. 2005. Amount: \$25,000.

Curriculum Vitae

ORAL PRESENTATIONS AT NATIONAL MEETINGS, continued:

14. Chan TC, Dunford JV, Vilke GM: Impact of a community multidisciplinary homeless outreach team. CAL/ACEP Scientific Assembly, Santa Clara, California; June 2001. (Won Award for Best Oral Presentation)
15. Clark RF, Phillips M, Manoguerra AS, Chan TC: Home calls from predominantly Latino communities to a regional poison center. North American Congress of Clinical Toxicology, Montreal, Canada; October 2001.
16. Vilke GM, Lev R, Castillo EM, Metz MA, Murrin PA, Chan TC: Prospective countywide trial to decrease ambulance diversion hours. SAEM Western Regional Meeting, Scottsdale, Arizona; April 2003.
17. Killeen JP, Chan TC, Smith M, Huches D, Hidley G, Lenert L: Prehospital Field Telemedicine Evaluation Utilizing 1xEV-D0 Wireless Internet. American Telemedicine Association Annual Meeting, Orlando, Florida; April 2003.
18. Vilke GM, Lev R, Castillo EM, Metz MA, Murrin PA, Chan TC. The effect of decreasing ambulance diversion hours on emergency department interfacility transfers. ACEP Annual Meeting, Boston, Massachusetts, October 2003.
19. Killeen J, Chan TC. A wireless first responder handheld device for rapid triage, patient assessment and documentation during mass casualty incidents. AMIA Annual Symposium, Washington, DC, November 2006.
20. Lenert LA, Chan TC, et al: Wireless internet information system for medical response in disasters (WIISARD). AMIA Annual Symposium, Washington, DC, November 2006.

Curriculum Vitae
Theodore C. Chan, M.D., FACEP

PRESENTATIONS/SPEAKING ENGAGEMENTS:

1. "Anorectal Disorders and Emergencies" -- Emergency Medicine Core Curriculum Conference, UCSD Medical Center; December 1993.
2. "Ear and Nose Emergencies" -- Emergency Medicine Core Curriculum Conference, UCSD Medical Center; January 1995.
3. "Marine Envenomations" -- Emergency Medicine Toxicology Conference, UCSD Medical Center; August 1995.
4. "Child Abuse in the Emergency Department" --
 - Emergency Medicine Core Curriculum Conference, UCSD Medical Center; September 1995.
 - Noon Conference, Department of Emergency Services, San Francisco General Hospital; January 1996.
5. "Thrombolytics in Noncardiac Emergencies" -- Grand Rounds, Department of Emergency Medicine, UCSD Medical Center; May 1996.
6. "Billing in the Emergency Department" -- Emergency Medicine Resident Orientation, UCSD Medical Center; July 1996.
7. "EMS Data Innovations - Prehospital AMA Patients" -- Shaping EMS for the 21st Century Conference, Emergency Medical Services Administrators Association of California, San Diego, California; May 1997.
8. "Non-accidental Trauma (NAT)" -- County-wide Field Care Audit, presented by Mercy Hospital and UCSD Medical Center, San Diego, California; May 1998.
9. "Trauma" -- UCSD National City School District Systemic Teacher Enhancement Project, National City, California; June 1998.
10. "Prehospital Research" -- Prehospital Audit Committee, County of San Diego; September 15, 1998.
11. "Emergency Medicine Research" -- Howard Hughes Student Lecture, UC San Diego, November 3, 1998.
12. "The Impact of Oleoresin Capsicum Spray on Respiratory Function in the Sitting and Hobble Restraint Positions" --
 - San Diego Regional Public Safety Training Institute; March 11, 1999.
 - San Diego SWAT Teams Unit; May 12, 1999.
13. "Studies in Restraint Physiology" -- Grand Rounds, Department of Emergency Medicine, UCSD Medical Center; July 13, 1999.

Curriculum Vitae
Theodore C. Chan, M.D., FACEP

PRESENTATIONS/SPEAKING ENGAGEMENTS, continued:

14. Results of the National Institute of Justice Study on Oleoresin Capsicum Spray, sponsored by the U.S. Department of Justice -- San Diego Regional Public Safety Training Institute; September 30, 1999.
15. "Outpatient Treatment of Deep Venous Thrombosis" -- Clinical Practice Guidelines for the Primary Care Physician, sponsored by UCSD School of Medicine, San Diego, California; November 20, 1999.
16. "Restraint Position and Positional Asphyxia" -- Invited presentation to the Health and Human Services Subcommittee, Grand Jury, County of San Diego; November 1999.
17. "Management and Triage of Heart Failure Patients in the Emergency Department" -- Congestive Heart Failure Task Force Conference, UCSD Medical Center; January 26, 2000, February 9, 2000.
18. "Anatomy of a Lawsuit: The Dollars, Sense, and Strategies of Medical Malpractice Litigation" --
 - Housestaff Association, Alumni and Faculty, UCSD Medical Center; March 15, 2000.
 - Department of Medicine Noon Conference, UCSD Medical Center; March 16, 2000.
19. Findings of the National Institute of Justice Study on Oleoresin Capsicum Spray and Respiratory Function -- Nonlethal Defense IV Conference, National Defense Industrial Association, Tysons Corner, Virginia; March 22, 2000.
20. "Overview of Findings From Study on Positional Asphyxia and Pepper Spray" -- to the Liability Panel, Less-Than-Lethal Technology and Policy Assessment, National Institute of Justice, United States Department of Justice, Washington, DC; June 20, 2000.
21. "Positional Asphyxia Review" -- 2000 PPCT Use of Force Conference, St. Louis, Missouri; July 14, 2000.
22. Keynote Address: "Myocardial Reperfusion" -- Emergency Medicine in Jackson Hole Conference, Jackson Hole, Wyoming; August 14, 2000.
23. Difficult Airway Panel (Davis D, Wolfe R, Chan T, Bramwell K) -- Emergency Medicine in Jackson Hole Conference, Jackson Hole, Wyoming; August 15, 2000.
24. "Conscious Sedation" -- Emergency Medicine in Jackson Hole Conference, Jackson Hole, Wyoming; August 17, 2000.
25. Airway Workshop (Wolfe R, Chan T, Bramwell K, Davis D) -- Emergency Medicine in Jackson Hole Conference, Jackson Hole, Wyoming; August 17, 2000.
26. "Findings of the National Institute of Justice Oleoresin Capsicum Exposure and Restraint Study" -- San Diego Special Enforcement Detail (SWAT), County of San Diego, California; October 18, 2000.

Curriculum Vitae
Theodore C. Chan, M.D., FACEP

PRESENTATIONS/SPEAKING ENGAGEMENTS, continued:

27. "OC Spray and Positional Asphyxia: Separating Fact from Fiction" -- International Association of Chiefs of Police 107th Annual Conference, San Diego, California; November 11, 2000.
28. "Positional Asphyxia and Oleoresin Capsicum: Results of the National Institute of Justice Study" -- Non-Lethal Chemical Agents for Trainers Conference, Carlsbad, California; November 15, 2000.
29. "Common ENT Emergencies Seen in the ED"; "Non-accidental Trauma"; "New Strategies for Acute Myocardial Perfusion"; "Procedural Analgesia and Sedation" -- Mammoth Mountain Emergency Medicine Conference, Mammoth Lakes, California; March 5-6, 2001.
30. "Emerging Infections: The Coming Plague" -- ACEP Emergency Medicine Connection, San Diego, California; March 20, 2001.
31. "Emergency Procedural Analgesia & Sedation" -- CAL/ACEP Scientific Assembly, Santa Clara, California; June 8, 2001.
32. "Clinical Aspects of Bioterrorism" -- San Diego County Health and Human Services; December 6, 2001.
33. "Awareness and Use of the California Regional Poison Center in Two Ethnically Diverse Communities in San Diego" -- San Diego Briefings of the UCSD Civic Collaborative, San Diego, California; March 19, 2002.
34. "Bio-Terrorism: Disaster Preparedness in San Diego" -- Emergency Department Second Annual Symposium, Sharp Grossmont Hospital, San Diego, California; April 17, 2002.
35. "Emergency Management of Rhythm Disorders" -- Arrhythmic & Ischemic Emergencies: New Treatment Approaches - Dinner Symposium, Los Angeles, California; June 13, 2002.
36. Roundtable on Cultural Diversity Competency and Training -- Council of Residency Directors, ACEP Scientific Assembly, Seattle, Washington, October 7, 2002.
37. "Chemical Agent Overview" -- San Diego County Health and Human Services; January 8, 2003.
38. "Positional Asphyxia and Sudden Custody Death – Separating Fact from Fiction" -- American Society for Law Enforcement Training, Ontario, California; January 10, 2003.
39. "Reperfusion for AMI" -- Western States Winter Conference on Emergency Medicine, Park City, Utah; January 22, 2003.
40. "ENT Emergencies" -- Western States Winter Conference on Emergency Medicine, Park City, Utah; January 23, 2003.

Curriculum Vitae
Theodore C. Chan, M.D., FACEP

PRESENTATIONS/SPEAKING ENGAGEMENTS, continued:

41. "Bioterrorism Update: Smallpox and Smallpox Vaccination" -- San Diego County Sheriff's Department, SWAT, and Special Enforcement Detail, San Diego, California; February 10, 2003.
42. "Academic Emergency Medicine and Research Opportunities" -- San Diego Health Information Association, San Diego, California; February 11, 2003.
43. "Bioterrorism Update: Smallpox and Smallpox Vaccination" -- San Diego County Sheriff's Department, ASTREA Division, San Diego, California; March 14, 2003.
44. "Positional Asphyxia" -- American Correctional Health Services Association Conference 2003, San Diego, California; September 25, 2003.
45. "Challenging ECG cases in the ED: Pearls and Pitfalls" -- Western States Winter Conference on Emergency Medicine, Park City, Utah; January 28, 2004.
46. "Positional Asphyxia" -- San Diego County Sheriff's Department – Medical Division, San Diego, California; January 29, 2004.
47. "Improving Patient Flow and Reducing ED Crowding: Findings from 10 Hospitals" -- Urgent Matters, Web-based program, World Wide Web; July 1, 2004.
48. "After-the-Fire Grantee Summit" -- The San Diego Foundation, San Diego, California; October 21, 2004.
49. "Wireless Internet Information System for Medical Response to Disasters – The WIISARD Project" -- San Diego Metropolitan Medical Strike Team, San Diego, California; November 17, 2004.
50. "Urgent Matters Study (input, throughput, output) of UCSD Medical Center's Emergency Department" -- San Diego Community Emergency Departments, San Diego, California; December 2, 2004.
51. "Best Practices of other Urgent Matters Hospitals" -- San Diego Community Emergency Departments, San Diego, California; December 2, 2004.
52. "Emergency Room Problems in San Diego; How Can We Improve Quality?" -- The San Diego Patient Safety Consortium Patient Safety Forum, San Diego, California; December 16, 2004.
53. "Emergency Response Management for Efficiency of Care and Fiscal Consideration" -- American Correctional Health Services Association, Oakland, California; April 2, 2005.
54. "Promise and Pitfalls: Emergency Department Information Systems" -- Urgent Matters Regional Conferences, Atlanta, Georgia; October 14, 2005.

Curriculum Vitae
Theodore C. Chan, M.D., FACEP

PRESENTATIONS/SPEAKING ENGAGEMENTS, continued:

55. "Promise and Pitfalls: Emergency Department Information Systems" -- Urgent Matters Regional Conferences, Las Vegas, Nevada; October 28, 2005.
56. "Wireless Internet Information System for Medical Response to Disasters" -- Metropolitan Medical Response System Quarterly Meeting, San Diego, California; January 19, 2006.
57. "In-Custody Sudden Deaths" -- Florida Sheriff's Association One Day Symposium, Orlando, Florida; June 1, 2006.
58. "They Didn't Need to Shoot Him: Providing Effective Alternatives to Lethal Force" Plenary Panel -- The National Institute of Justice Conference, Washington D.C.; July 18, 2006.
59. "Use of Force: Sudden Death Myths and Excited Delirium" - The Commission of Accreditation for Law Enforcement Agencies (CALEA) Less Lethal Technology Working Group Meeting, Washington D.C.; September 10, 2006.
60. "Cardiac, Respiratory, and Metabolic Effects of EMD" - NIJ Steering Group Committee, US Department of Justice, Office of Justice Programs, Washington D.C.; October 30, 2006.
61. "IT Innovation in an Academic Emergency Department" - Institute for Healthcare Improvement Meeting, San Diego, California; November 2, 2006.
62. "Restraint Physiology: Separating Fact from Fiction" - Sudden Death, Excited Delirium and In-custody Death Conference, Las Vegas, Nevada; November 16, 2006.
63. "Use of Force and Sudden In-Custody Death" - Minnesota Dept of Public Safety — Bureau of Criminal Apprehension, Minneapolis, Minnesota; April 30, 2007.
64. "Chlorine Gas Exposure and Chemical Terrorism" - San Diego County Metropolitan Medical Strike Team, San Diego, California; September 19, 2007.
65. "Power of Innovation: The Strategic Use of Technology to Improve the Patient Experience" - CEO Rounds, UCSD Medical Center, San Diego, California; September 20, 2007.
66. "Tasers" - San Diego County EMS/ED American Medical Response Field Care Audit, San Diego, California; September 26, 2007.
67. "ER Overcrowding," Panelist - ER Overcrowding Summit, San Diego, California; October 2, 2007.
68. "Restraints and Sudden Death" - Sudden Death, Excited Delirium and In-Custody Death Conference, Las Vegas, Nevada; November 28, 2007.
69. "UCSD Emergency Medicine" - DOM Clinical Service Chief's Meeting, San Diego, California; May 20, 2008.
